

The world's smallest, most convenient portable oxygen system ever developed is perfect for athletes, active people, and anyone who wants a shot of pure oxygen. The lightweight and compact ergo-dynamic design of the Oxy2Go Portable Oxygen System Regulator and Cylinder Unit fits comfortably into the palm of your hand so you can take a hit without interrupting the action. Totally portable, simply drop it into your shirt or pants pocket, backpack, or easily attach it to your sports equipment. A super convenient belt holder that fits the regulator and a spare cylinder is also available. Each oxygen cylinder contains pressurized oxygen providing approximately 14 one second blasts of oxygen. Completely free of any contaminants or pollutants found in normal atmospheric air and polluted environments. **Oxy2Go...it's a BLAST** Get yours now.
